

BK 17.006-13 is a **great tasting, year-round primocane** blackberry with genetic potential for **zero to very low reversion**.

This highly-productive, vigorous primocane **requires zero chill**, making it **adaptable** to various climates, altitudes, and planting dates.

With **reduced thorns** and open growth habit, BK 17.006-13 enables efficient picking speeds, **longer harvest intervals** and reduced pest and disease incidence – **optimizing fruit quality 52 weeks/year**.
